📍Ankara, Turkey

Experience

Data Science Intern IntelProbe

13/07/2020–Present Ankara, Turkey

• Received educations on Data Science, Big Data, Signal Processing and Quantum Computing.

Computer Vision Engineering Trainee Upteko

01/08/2019–01/11/2019 Odense, Denmark

Upteko develops drone technologies for the maritime industry.

• Development of computer vision and image processing algorithms on embedded microcomputers. Used technologies; Python, OpenCV, ROS, Gazebo, Nvidia Jetson Nano.

• Developed an algorithm that gives to the captain a bird view from a UAV and an idea of how far away from the harbor, that prevents the company from hiring a Ph.D. for six months, which causes 40k € saving.

R&D Engineer (Part-Time)

Novumare Technologies

01/01/2019–01/07/2019 Istanbul, Turkey

A company producing USV(Unmanned Surface Vehicle) for the maritime industry.

• Image processing and vision-based software development using Python, OpenCV.

Intern VESTEL Defence Industry

27/08/2018–25/09/2018 Ankara, Turkey

A high-tech company producing UAV needs of modern armies.

• Researches on communication interfaces such as RS232, RS485, and CAN-BUS.

• Observation of the application of CAN-BUS and RS485 for simulation testing with Matlab Simulink.

Intern Alp Aviation

09/07/2018–31/07/2018 Eskişehir, Turkey

A high-tech Sikorsky corporation producing of modern aircraft's motor components, dynamic parts & assemblies.

• Application of basic automatic control systems based on relays, switches, encoders, and motors.

• Observation of solutions brought by PLC and SCADA programming.

Education

Bachelor of Science

Electrical and Electronics Engineering

Atılım University

Turkey Ankara,

2015–2019

CGPA: 3,16/4,0 Honor Student, 100% English education

Specialization Courses;

- Digital Signal Processing
- Digital Image Processing
- Robot Vision
- Advanced Digital Design with HDL
- RF and Microwave Engineering
- Wireless Communication

Bachelor of Science

Electrical Engineering and Computer Science

Tampere University of Technology

Finland Tampere,

2018–2018

Attended Erasmus+ Exchange Program

Courses;

- Introduction to Control
- Microprocessors
- Pattern Recognition and Machine Learning (Master Course/Fail)

Skills

Python

C/C++

GNU/Linux

OpenCV

PyTorch

TensorFlow/Keras

MATLAB/Simulink

ROS

NumPy/Pandas

Apache Hadoop

Apache Spark

Languages

Turkish Native or Bilingual Proficiency

English Professional Working Proficiency

Awards

50 Outstanding Student Atılım University

2019

Honor Student Atılım University

2019

Projects

AI-Powered Glasses for Visually Impaired Individuals

Engineering Design Project

2019

This project performing as a final year engineering design project supported by the Scientific and Technological Research Council of Turkey (TUBITAK) in the scheme of 2209B Industry-Oriented Undergraduate Graduation Thesis Support Program. With this project, we aimed to provide an easier life for visually impaired people.

Functions of the system;

- Object Recognition
- Colour Recognition
- Facial Expression Analysis
- Indoor Positioning
- Voice Assistant

Technologies; Tensorflow/Keras with Python for Deep Learning (Convolutional Neural Networks) and Speech Synthesis

Object Detection on Stitched Video Stream Self-project

2019

Performing object detection algorithm on a stitched video stream from two different webcam.

Brain Tumor Detection Course Project

2019

Digital Image Processing course project. Have done in MATLAB.

IP Parsing Course Project

2015

Introduction to the programming course project. Written in C++.
